

1. A fusible non-woven fibrous quilt batt comprising:
a non-woven fibrous quilt batt; and
a heat sealable and releasable adhesive in said quilt batt, wherein said adhesive binds the fibers of the batt and provides a tackiness sufficient to allow said batt to be applied to, removed from, and reapplied to an adjacent quilt material selected from the group consisting of a backing material of a quilt and a top fabric of a quilt during the formation of the quilt.

2. The quilt batt of claim 1 wherein said adhesive remains substantially in said batt during removal of the batt from and reapplication of the batt to said adjacent material.

A2

3. The quilt batt of claim 1 wherein said adhesive includes a thermoplastic.

4. The quilt batt of claim 3 wherein said adhesive is selected from the group consisting of an acrylic, a vinyl acrylic, a vinyl acetate, and an ethylene vinyl acetate.

5. The quilt batt of claim 3 wherein said adhesive further includes itaconic acid.

6. The quilt batt of claim 1 wherein said batt includes fiber selected from the group consisting of cotton, polyester, rayon, nylon and wool.

A1
Cot

7. The quilt batt of claim 1 wherein said batt includes cotton and a polyester.
